Grade five* art incorporates a variety of two- and three-dimensional concepts and ideas in art and digital media and processes to influence personal artistic decisions and create visual unity. Materials are correctly, safely, and responsibly applied to achieve diverse effects and meet established criteria. An art-criticism process leads to a hypothesis about the meanings of creative products and utilitarian objects. Observation skills and prior knowledge are employed to reflect on and revise personal works of art. During the creative process, students use accurate art vocabulary, terms, and procedures, as well as time-management and collaborative skills.

Art - Intermediate 3 (#5001060)

Version: 2025 - And Beyond (current)

Course Version Note

The Art Education 7-12 certification was removed.

Course Standards

Visit the specific benchmark webpage to find related instructional resources.

- [VA.5.C.1.1:](#) Develop a range of interests in the art-making process to influence personal decision-making.
- [VA.5.C.1.2:](#) Use prior knowledge and observation skills to reflect on, analyze, and interpret exemplary works of art.
- [VA.5.C.1.3:](#) Examine and discuss exemplary works of art to distinguish which qualities may be used to evaluate personal works.
- [VA.5.C.2.1:](#) Revise artwork as a necessary part of the creative process to achieve an artistic goal.

- [VA.5.C.2.2:](#) Analyze personal artworks to articulate the motivations and intentions in creating personal works of art.
- [VA.5.C.2.3:](#) Apply established criteria to the art-making process to measure artistic growth.
- [VA.5.C.2.4:](#) Identify examples of constructive criticism and use them to improve artworks and enhance artistic growth.
- [VA.5.C.3.1:](#) Use the structural elements of art and organizational principles of design when engaged in art criticism.
- [VA.5.C.3.2:](#) Use art-criticism processes to form a hypothesis about an artist's or designer's intent when creating artworks and/or utilitarian objects.
- [VA.5.C.3.3:](#) Critique works of art to understand the content and make connections with other content areas.
- [VA.5.F.1.1:](#) Examine and experiment with traditional or non-traditional uses of media to apply imaginative techniques in two- and/or three-dimensional artworks.
- [VA.5.F.1.2:](#) Develop multiple solutions to solve artistic problems and justify personal artistic or aesthetic choices.
- [VA.5.F.2.1:](#) Describe the knowledge and skills necessary for art-making and art-related careers.
- [VA.5.F.2.2:](#) Explore careers in which artworks and utilitarian designs are created.
- [VA.5.F.2.3:](#) Discuss contributions that artists make to society.
- [VA.5.F.3.1:](#) Create artwork to promote public awareness of community and/or global concerns.
- [VA.5.F.3.2:](#) Create artwork that shows procedural and analytical thinking to communicate ideas.
- [VA.5.F.3.3:](#) Work collaboratively with others to complete a task in art and show leadership skills.
- [VA.5.F.3.4:](#) Follow directions and complete artwork in the timeframe allotted to show development of 21st-century skills.
- [VA.5.H.1.1:](#) Examine historical and cultural influences that inspire artists and their work.
- [VA.5.H.1.2:](#) Use suitable behavior as a member of an art audience.
- [VA.5.H.1.3:](#) Identify and describe the importance a selected group or culture places on specific works of art.
- [VA.5.H.1.4:](#) Explain the importance of artwork to show why respect is or should be given to the work of peer or specified professional artists.

- [VA.5.H.2.1](#): Compare works of art on the basis of style, culture, or artist across time to identify visual differences.
- [VA.5.H.2.2](#): Describe the ways in which artworks and utilitarian objects impact everyday life.
- [VA.5.H.2.3](#): Discuss artworks found in public venues to identify the significance of the work within the community.
- [VA.5.H.3.1](#): Discuss how skills learned through the analysis and art-making process are used to solve problems in non-art areas.
- [VA.5.O.1.1](#): Use structural elements of art and organizational principles of design to develop content in artwork.
- [VA.5.O.1.2](#): Organize the structural elements of art to achieve visual unity.
- [VA.5.O.1.3](#): Explain how creative and technical ability is used to produce a work of art.
- [VA.5.O.2.1](#): Analyze works of art that document people and events from a variety of places and times to synthesize ideas for creating artwork.
- [VA.5.O.2.2](#): Use a variety of sources for ideas to resolve challenges in creating original works.
- [VA.5.O.3.1](#): Create meaningful and unique works of art to effectively communicate and document a personal voice.
- [VA.5.S.1.1](#): Use various art tools, media, and techniques to discover how different choices change the effect on the meaning of an artwork.
- [VA.5.S.1.2](#): Use media, technology, and other resources to inspire personal art-making decisions.
- [VA.5.S.1.3](#): Create artworks to depict personal, cultural, and/or historical themes.
- [VA.5.S.1.4](#): Use accurate art vocabulary to communicate about works of art and artistic and creative processes.
- [VA.5.S.2.1](#): Organize the structural elements of art to support planning, strengthen focus, and implement artistic vision.
- [VA.5.S.2.2](#): Identify sequential procedures to engage in art production.
- [VA.5.S.2.3](#): Visualize the end product to justify artistic choices of tools, techniques, and processes.
- [VA.5.S.3.1](#): Use materials, tools, techniques, and processes to achieve expected results in two- and/or three-dimensional artworks.

- [VA.5.S.3.2](#): Use craftsmanship and technical ability in personal works to show refinement of skills over time.
- [VA.5.S.3.3](#): Use tools, media, techniques, and processes in a safe and responsible manner.
- [VA.5.S.3.4](#): Use ethical standards, including copyright laws, when producing works of art.
- [MA.K12.MTR.1.1](#): **Actively participate in effortful learning both individually and collectively.**

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.
- [MA.K12.MTR.2.1](#): **Demonstrate understanding by representing problems in multiple ways.**

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.

- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

• **MA.K12.MTR.3.1: Complete tasks with mathematical fluency.**

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.

- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
- **MA.K12.MTR.4.1: Engage in discussions that reflect on the mathematical thinking of self and others.**

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.
- **MA.K12.MTR.5.1: Use patterns and structure to help understand and connect mathematical concepts.**

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

• [MA.K12.MTR.6.1](#): **Assess the reasonableness of solutions.**

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

• [MA.K12.MTR.7.1](#): **Apply mathematics to real-world contexts.**

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

- [ELA.K12.EE.1.1](#): Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

- [ELA.K12.EE.2.1](#): Read and comprehend grade-level complex texts proficiently.

Clarifications:

See [Text Complexity](#) for grade-level complexity bands and a text complexity rubric.

- [ELA.K12.EE.3.1](#): Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

- [ELA.K12.EE.4.1](#): Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

- [ELA.K12.EE.5.1](#): Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

- [ELA.K12.EE.6.1](#): Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we

talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

- [ELD.K12.ELL.SI.1](#): English language learners communicate for social and instructional purposes within the school setting.

Course Information

General Notes

All instruction related to Visual Art benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Visual Art benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

*Intermediate Visual Art 1, 2, and 3 have been designed in two ways: 1) to challenge students *on grade level* who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the upper elementary grades. Visual Art teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

Examples:

- A 3rd grade class that may or may not have taken Visual Art previously should be enrolled in Intermediate Visual Art 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Visual Art for the first time may be enrolled, as a class, in Intermediate Visual Art 1, and must then progress to Intermediate Visual Art 2 in the following year.
- Special Note: This course incorporates hands-on activities and consumption of art materials.

Special Note: This course incorporates hands-on activities and consumption of art materials.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students.

Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/si.pdf>

General Information

Course Number: 5001060

Course Path: **Section:** Grades PreK to 12 Education Courses >

Grade Group: Grades PreK to 5 Education Courses > **Subject:** Art - Visual Arts > **SubSubject:** General >

Abbreviated Title: Art – INTERM 3

Course Length: Year (Y)

Course Status: State Board Approved

Grade Level(s): 3,4,5

Educator Certifications

One of these educator certification options is required to teach this course.

- [Art Education \(Elementary Grades 1-6\)](#)
- [Art \(Elementary and Secondary Grades K-12\)](#)
- [Art Education \(Elementary and Secondary Grades K-12\)](#)
- [Classical Education - Restricted \(Elementary and Secondary Grades K-12\)](#)

Section 1012.55(5), F.S., authorizes the issuance of a classical education teaching certificate, upon the request of a classical school, to any applicant who fulfills the requirements of s. 1012.56(2)(a)-(f) and (11), F.S., and Rule 6A-4.004, F.A.C. Classical schools must meet the requirements outlined in s. 1012.55(5), F.S., and be listed in the [FLDOE Master School ID](#) database, to request a restricted classical education teaching certificate on behalf of an applicant.

- [Part-Time, Non-Degreed Performing and Fine Arts \(Career & Technical\)](#)
- [Part-Time, Non-Degreed Performing and Fine Arts \(District-issued Employment Certificate\)](#)
