M/J World History (#2109010)

Version: 2026 - And Beyond

You are not viewing the current course, please click the current year's tab.

Course Version Note

Updated benchmarks and course description.

Course Standards

Visit the specific benchmark webpage to find related instructional resources.

- [SS.6.CG.1.1](#): Analyze how democratic concepts developed in ancient Greece served as a foundation for the United States' constitutional republic.

Clarifications:

Clarification 1: Students will identify and explain the democratic principles of government in ancient Greece.

Clarification 2: Students will compare and contrast the political systems of ancient Greece and modern-day United States.

Clarification 3: Students will recognize the influence of ancient Greece on the American political process.

- [SS.6.CG.1.2](#): Analyze the influence of ancient Rome on the United States' constitutional republic.

Clarifications:

Clarification 1: Students will compare and contrast the political systems in ancient Rome and modern-day United States.

Clarification 2: Students will recognize the influence of ancient Rome on the American political process.

- [SS.6.CG.1.3:](#) Examine rule of law in the ancient world and its influence on the United States' constitutional republic.

Clarifications:

Clarification 1: Students will recognize origins of the rule of law including, but not limited to, the contributions of ancient Jewish, ancient Greek and ancient Roman civilizations.

Clarification 2: Students will recognize that the rule of law is a foundational principle of the U.S. government.

- [SS.6.CG.1.4:](#) Examine examples of civic leadership and virtue in ancient Greece and ancient Rome.

Clarifications:

Clarification 1: Students will explain the influence of significant leaders (e.g., Marcus Tullius Cicero, Marcus Aurelius, Pericles, Solon, Cleisthenes) on civic participation and governance in the ancient world.

- [SS.6.E.1.1:](#) Identify the factors (e.g., new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
- [SS.6.E.1.3:](#) Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (e.g., land, labor, capital, entrepreneurship).
- [SS.6.E.2.1:](#) Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
- [SS.6.E.3.1:](#) Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
- [SS.6.E.3.2:](#) Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.

- [SS.6.E.3.3](#): Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
- [SS.6.E.3.4](#): Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
- [SS.6.G.1.1](#): Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
- [SS.6.G.1.2](#): Analyze the purposes of map projections (e.g., political, physical, special purpose) and explain the applications of various types of maps.
- [SS.6.G.1.3](#): Identify natural wonders of the ancient world.
- [SS.6.G.1.5](#): Use scale, cardinal and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
- [SS.6.G.1.6](#): Use a map to identify major bodies of water of the world and explain ways they have impacted the development of civilizations.
- [SS.6.G.1.7](#): Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today.
- [SS.6.G.2.1](#): Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
- [SS.6.G.2.2](#): Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations.
- [SS.6.G.2.3](#): Analyze the relationship of physical geography to the development of ancient river valley civilizations.
- [SS.6.G.2.4](#): Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies.
- [SS.6.G.2.5](#): Interpret how geographic boundaries invite or limit interaction with other regions and cultures.
- [SS.6.G.2.6](#): Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another.
- [SS.6.G.2.7](#): Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
- [SS.6.G.3.1](#): Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.

- [SS.6.G.3.2:](#) Analyze the impact of human populations on the ancient world's ecosystems.
- [SS.6.G.4.1:](#) Explain how family and ethnic relationships influenced ancient cultures.
- [SS.6.G.4.2:](#) Use maps to trace significant migrations and analyze their results.
- [SS.6.G.4.3:](#) Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
- [SS.6.G.4.4:](#) Map and analyze the impact of the spread of various belief systems in the ancient world.
- [SS.6.G.5.1:](#) Identify the methods used to compensate for the scarcity of resources in the ancient world.
- [SS.6.G.5.2:](#) Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
- [SS.6.G.5.3:](#) Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
- [SS.6.G.6.1:](#) Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
- [SS.6.HC.1.1:](#) Explain ancient communal systems and the effect on their respective societies.

Clarifications:

Clarification 1: Instruction includes Spartan communal life, Sparta's dependency on helots (slaves), the Agoge system and Sparta's limited trade and innovation.

Clarification 2: Instruction includes Roman society, the latifundia, reliance on slave labor and the role of the Cura Annonae.

- [SS.6.W.1.1:](#) Use timelines to identify chronological order of historical events.
- [SS.6.W.1.2:](#) Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
- [SS.6.W.1.3:](#) Interpret primary and secondary sources.
- [SS.6.W.1.4:](#) Describe the methods of historical inquiry and how history relates to the other social sciences.
- [SS.6.W.1.5:](#) Describe the roles of historians and recognize varying historical interpretations (historiography).

- [SS.6.W.1.6](#): Describe how history transmits culture and heritage and provides models of human character.
- [SS.6.W.2.1](#): Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
- [SS.6.W.2.2](#): Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
- [SS.6.W.2.3](#): Identify the characteristics of civilization.
- [SS.6.W.2.4](#): Compare the economic, political, social, and religious institutions of ancient river civilizations.
- [SS.6.W.2.5](#): Summarize important achievements of Egyptian civilization.
- [SS.6.W.2.6](#): Determine the contributions of key figures from ancient Egypt.
- [SS.6.W.2.7](#): Summarize the important achievements of Mesopotamian civilization.
- [SS.6.W.2.8](#): Determine the impact of key figures from ancient Mesopotamian civilizations.
- [SS.6.W.2.9](#): Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area.
- [SS.6.W.2.10](#): Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.
- [SS.6.W.3.1](#): Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
- [SS.6.W.3.2](#): Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
- [SS.6.W.3.3](#): Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
- [SS.6.W.3.4](#): Explain the causes and effects of the Persian and Peloponnesian Wars.
- [SS.6.W.3.5](#): Summarize the important achievements and contributions of ancient Greek civilization.
- [SS.6.W.3.6](#): Determine the impact of key figures from ancient Greece.
- [SS.6.W.3.7](#): Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.

- [SS.6.W.3.8](#): Determine the impact of significant figures associated with ancient Rome.
- [SS.6.W.3.9](#): Explain the impact of the Punic Wars on the development of the Roman Empire.
- [SS.6.W.3.10](#): Describe the government of the Roman Republic and its contribution to the development of democratic principles (i.e., separation of powers, rule of law, representative government, civic duty).
- [SS.6.W.3.11](#): Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
- [SS.6.W.3.12](#): Explain the causes for the growth and longevity of the Roman Empire.
- [SS.6.W.3.13](#): Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
- [SS.6.W.3.14](#): Describe the key achievements and contributions of Roman civilization.
- [SS.6.W.3.15](#): Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
- [SS.6.W.3.16](#): Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
- [SS.6.W.3.17](#): Explain the spread and influence of the Latin language on Western Civilization.
- [SS.6.W.3.18](#): Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
- [SS.6.W.4.1](#): Discuss the significance of Aryan and other tribal migrations on Indian civilization.
- [SS.6.W.4.2](#): Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
- [SS.6.W.4.3](#): Recognize the political and cultural achievements of the Mauryan and Gupta empires.
- [SS.6.W.4.4](#): Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
- [SS.6.W.4.5](#): Summarize the important achievements and contributions of ancient Indian civilization.
- [SS.6.W.4.6](#): Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.

- [SS.6.W.4.7:](#) Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
- [SS.6.W.4.8:](#) Describe the contributions of classical and post classical China.
- [SS.6.W.4.9:](#) Identify key figures from classical and post classical China.
- [SS.6.W.4.10:](#) Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
- [SS.6.W.4.11:](#) Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
- [SS.6.W.4.12:](#) Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
- [MA.K12.MTR.1.1:](#) **Actively participate in effortful learning both individually and collectively.**

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

- **MA.K12.MTR.2.1: Demonstrate understanding by representing problems in multiple ways.**

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

- **MA.K12.MTR.3.1: Complete tasks with mathematical fluency.**

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

- **MA.K12.MTR.4.1: Engage in discussions that reflect on the mathematical thinking of self and others.**

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

- **MA.K12.MTR.5.1: Use patterns and structure to help understand and connect mathematical concepts.**

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

• **MA.K12.MTR.6.1: Assess the reasonableness of solutions.**

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"

- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.
- **MA.K12.MTR.7.1: Apply mathematics to real-world contexts.**

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.
- **ELA.K12.EE.1.1: Cite evidence to explain and justify reasoning.**

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing,

students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

- [ELA.K12.EE.2.1](#): Read and comprehend grade-level complex texts proficiently.

Clarifications:

See [Text Complexity](#) for grade-level complexity bands and a text complexity rubric.

- [ELA.K12.EE.3.1](#): Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

- [ELA.K12.EE.4.1](#): Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

- [ELA.K12.EE.5.1](#): Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills

appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

- [ELA.K12.EE.6.1](#): Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

- [ELD.K12.ELL.SI.1](#): English language learners communicate for social and instructional purposes within the school setting.
- [ELD.K12.ELL.SS.1](#): English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Course Information

General Notes

[Section 1003.42, Florida Statutes](#), outlines the topics that must be taught in Florida's public schools as part of required instruction. The Florida Department of Education supports districts in fulfilling these requirements through guidance, resources, and tools to ensure students receive instruction that promotes civic responsibility, character development, historical understanding, and digital safety.

This course satisfies statutory requirements for required instructional components:

- (2)(a)4 The elements of civil government

The primary content of this course covers the world's earliest civilizations through the ancient and classical civilizations of Africa, Asia, and Europe. Students will examine the political, economic, geographic, religious/philosophical, and social aspects of these civilizations to analyze their development, understand cultures, and compare different time periods. Instruction will also emphasize methods of historical inquiry, including the analysis of primary and secondary sources, to help students think critically about the past.

The content should include, but is not limited to, the following:

- Early river valley civilizations
- Classical civilizations of Africa, Asia, and Europe
- Geographic influences on historical development
- Economic systems and trade networks
- Political systems and forms of government
- Historical inquiry and analysis
- Use of primary and secondary sources
- Chronological thinking and cause-effect relationships in history

Mathematics Thinking and Reasoning Standards (MTRs)

The MTR are built on the following premises:

- Florida's state academic standards for social studies are taught through the lens of the MTRs; the MTRs are embedded throughout every lesson;
- language of the MTRs are expectations for students to use as self-monitoring tools during instruction every day;
- ensures that students are engaged, persevere in tasks, share their thinking, balance conceptual understanding and procedures, assess their solutions and make connections to previous and extended knowledge/learning; and
- standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

English Language Arts (ELA) Expectations (EEs)

- The ELA Expectations are those overarching skills that run through every component of instruction.
- These are skills that students should be using throughout the instruction of Florida's state academic standards for social studies.

For guidance on the implementation of the EEs, please visit [ELA B.E.S.T. STANDARDS: ENGLISH LANGUAGE ARTS](#). To access Mathematics Resources please visit [B.E.S.T Mathematics Resources \(fldoe.org\)](#).

English Language Development (ELDs)

- The ELDs are adopted from the World-Class Instruction Design and Assessment Consortium or WIDA.

- The standards represent the social, instructional and academic language that students need to engage with peers, educators and the curriculum in schools.

Teachers are required to provide listening, speaking, reading and writing instruction that allows English Language Learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following

General Information

Course Number: 2109010

Course Path: **Section:** Grades PreK to 12 Education Courses >

Grade Group: Grades 6 to 8 Education Courses > **Subject:** Social Studies > **SubSubject:** World and Eastern Hemispheric Histories >

Abbreviated Title: M/J WORLD HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Type: Core Academic Course

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

One of these educator certification options is required to teach this course.

- [Middle Grades Integrated Curriculum \(Middle Grades 5-9\)](#)
- [History \(Grades 6-12\)](#)
- [Social Science \(Grades 5-9\)](#)

- [Social Science \(Grades 6-12\)](#)
- [Elementary Education \(Grades K-6\)](#)
- [Elementary Education \(Elementary Grades 1-6\)](#)
- [Classical Education - Restricted \(Elementary and Secondary Grades K-12\)](#)

Section 1012.55(5), F.S., authorizes the issuance of a classical education teaching certificate, upon the request of a classical school, to any applicant who fulfills the requirements of s. 1012.56(2)(a)-(f) and (11), F.S., and Rule 6A-4.004, F.A.C. Classical schools must meet the requirements outlined in s. 1012.55(5), F.S., and be listed in the [FLDOE Master School ID](#) database, to request a restricted classical education teaching certificate on behalf of an applicant.
