Required Instruction:

Section 1003.42, Florida Statutes, outlines the topics that must be taught in Florida's public schools as part of required instruction. The Florida Department of Education supports districts in fulfilling these requirements through guidance, resources and tools to ensure students receive instruction that promotes civic responsibility, character development, historical understanding and digital safety.

This course partially satisfies statutory requirements for required instructional components:

- History of the Holocaust (2)(g)
- African American History (2)(h)
- History of Asian American and Pacific Islanders (2)(i)

This course is a continued in-depth study of the history of civilizations and societies from the middle school course and includes the history of civilizations and societies of North and South America. Students will be exposed to historical periods leading to the beginning of the 21st Century.

Content should include, but is not limited to:

- Use of geographic tools to analyze physical, cultural, political and economic patterns across regions and time.
- Development of skills in source analysis, timelines, cause/effect relationships and evaluating historical interpretations.
- Study of classical, medieval and non-Western civilizations and how they shaped modern societies.
- Exploration of major world religions, their origins, interactions and influence on culture and politics.

- The rise and fall of global empires; trade, conflict and cultural diffusion across regions
- The Renaissance, Reformation, Scientific Revolution and Enlightenment as drivers of change in thought, art and society.
- Motivations, consequences and global impact of exploration, colonialism, the Columbian Exchange and the slave trade.
- The impact of revolutions and reform movements on nations, ideologies and governance structures.
- Technological innovations, social upheaval, economic theories and responses to industrialization.
- Causes and effects of world wars, the Holocaust, Cold War tensions, independence movements, terrorism and modern global challenges.

Mathematics Thinking and Reasoning Standards (MTRs)

The MTR are built on the following premises:

- Florida's state academic standards for social studies are taught through the lens of the MTRs; the MTRs are embedded throughout every lesson;
- language of the MTRs are expectations for students to use as self-monitoring tools during instruction every day;
- ensures that students are engaged, persevere in tasks, share their thinking, balance conceptual understanding and procedures, assess their solutions and make connections to previous and extended knowledge/learning; and
- standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

English Language Arts (ELA) Expectations (EEs)

- The ELA Expectations are those overarching skills that run through every component of instruction.
- These are skills that students should be using throughout the instruction of Florida's state academic standards for social studies.

For guidance on the implementation of the Ees, please visit [ELA B.E.S.T. STANDARDS: ENGLISH LANGUAGE ARTS](#). To access Mathematics Resources please visit [B.E.S.T Mathematics Resources \(fldoe.org\)](#).

English Language Development (ELDs)

- The ELDs are adopted from the World-Class Instruction Design and Assessment Consortium or WIDA.
- The standards represent the social, instructional and academic language that students need to engage with peers, educators and the curriculum in schools.

Teachers are required to provide listening, speaking, reading and writing instruction that allows English Language Learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.
